PROFESSIONAL SUMMARY

Computer Science and Information Science student at UNC Chapel Hill with a minor in Artificial Intelligence, targeting cybersecurity analyst and SOC roles. Brings applied experience through project development and hands-on training through campus cybersecurity bootcamps, and a 4.0 GPA from dual-enrollment coursework.

EDUCATION

The University of North Carolina at Chapel Hill | Chapel Hill, NC **August 2026-May 2029**
B.S. in Computer Science & Information Science, Minor in Artificial Intelligence
Relevant Coursework: Introduction to Programming, Introduction to Data Science, AI Unlocked for Curious Minds, and Discrete Mathematics

Wilkes Community College | Wilkesboro, NC **August 2022-May 2026**
Associate's in Science | GPA: 4.0/4.0
Relevant Coursework: Precalculus Algebra and Trigonometry, Statistical Methods I, Calculus I-III, Java Programming, Linear Algebra, and Writing and Research in the Disciplines (with a focus on computer science)

Wilkes Early College High School | Wilkesboro, NC **August 2022-May 2026**
High School Diploma | GPA: 4.0/4.0 (Weighted **GPA**: 4.7)
Extracurriculars: Student Council (2023-2026), Student Ambassador (2022-2026), National Honor Society (2024-2026), Volunteer at Wilkesboro Elementary (2023-2026), and Varsity and Club Swimming (2022-2026)

SKILLS

- **Programming Languages:** Python, Java, C#, HTML/CSS
- **Tools and Libraries:** Pandas, BeautifulSoup, Matplotlib, Microsoft Office
- **Other Skills:** Leveraging Generative AI Models, Professional Writing, Public Speaking, Communication, Teamwork

PROJECTS

Cybersecurity Qualifications Web Scraper | Personal Project **September 2026**
- Developed a Python web scraper to query ~150 unique links and identify the certifications and skills employers most frequently seek in cybersecurity roles, visualizing findings as bar charts using Pandas and Matplotlib.
- Implemented concurrent web-page processing using BeautifulSoup and ThreadPoolExecutor, reusable HTTP sessions, request timeouts, retry handling, and progress tracking.
- Leveraged generative AI tools for debugging, documentation, and performance improvements; reviewed, tested, and adapted all generated suggestions.

Solar Simulator | Personal Project **Fall 2023**
- Built an interactive, Newtonian physics-based scale model of the solar system in the Unity Game Engine using C#, with support for real-time manipulation and addition of celestial bodies.

RELEVANT ACTIVITIES

Rams Hack Member (Student Organization) | Chapel Hill, NC **Fall 2026**
- Attended weekly cybersecurity bootcamps covering both beginner and advanced topics in core security skills.
